THANK YOU FOR THE INTEREST IN LUCID OPTICS

First, thank you for the interest in LUCID Optics. I would like to personally extend a very sincere thank you to all of our supporters. You have made our dream of growing a company the old fashioned way, one satisfied customer at a time, a reality.

We strive, every day to live up to the demanding expectations of our loyal customers. Without our loyal, satisfied customers, the dream that is "LUCID Optics" would not be possible. I can't begin to express how excited we are to share with you all of the NEW products this year and to see the top sellers continue to gain reach in the industry.

Just as important as it was when we began, maybe even more so today, keeping up with today's political and economic forces is tough enough without spending excessive amounts on the right gear. In a world gone crazy with corporate attitudes and high prices we are proud to still be an exception. This is achieved by challenging stereotypes and thoughtfully creating our items with features and benefits that make sense for the intended use. There will not be any "me too" products in our line. Each one is designed to fit a specific set of needs. We firmly believe that overkill is truly underrated and when applied skillfully and properly there really are no limits to what is possible. We create our products through practical hands on approach, not in a boardroom or in a high-rise building somewhere, but on the range in the hands of capable law enforcement, military, competition and recreational shooters alike. This foundation and approach in the product development ensures that LUCID Optics is able to offer a refreshing, functional perspective on all of the critical details of each product we produce.

Thank you & Best Regards,
Jason Wilson | CEO & Founder of LUCID Optics

Litl Mo

MICRO RED DOT SIGHT

LITL MO MICRO DOT SIGHT

A NEW DIMENSION IN FIELD OF VIEW FOR IT'S SIZE

MSRP: \$349

As with anything, size matters. We took the task of creating a micro red dot sight that could be used on a carbine as well as a pistol not just as a novelty but seriously.

Obviously, it has to be durable and light weight. We took it a step further by enlarging the perceived FOV as well as allowing for a battery change that does not require un-mounting the optic.

The LUCID Optics tough, aluminum housing ensures the unit will stand up to the challenges you send it's way. A high-quality, fully multi-coated lens ensures that the optic always provides a crisp, clean, wide field of view.

Our Power Drawer, side loading battery system makes changing the battery super easy and alleviates the need to remove the Litl MO from the firearm platform when changing out the power source.

The red dot brightness controls are located on the left side of the unit. With flush 1/2 MOA windage and elevation adjustments to get your zero achieved quickly.

Take the "Litl MO" out for a run, and make your AR, pistol, or shotgun something you shoot things with, rather than something you shoot at things with. The 3MOA dot promotes easy and fast target acquisition, while providing a positive point of aim. Making follow up shots much easier.

CONSTRUCTION	Objective Lens	28x19mm

HD7

RED DOT SIGHT

LUCID OPTICS competitive Shooter David Wood getting it done at a PCC match in 2018

In the last few years the HD7 Red Dot sight from LUCID Optics has been battle proven and tested in the very capable hands of Law Enforcement and Military professionals. While we believe in the old adage, "If it's not broke, don't fix it." It was time to make a set of customer requested improvements to the HD7 and introduce the Generation III unit. These improvements include capped turrets, a new reticle set with more capabilities for the operator built in and the availability of a Flash Filter accessory. We also have upgraded the buttons to be more durable and the light sensor is nearly twice as sensitive as previous versions.

As with the original version of the HD7, you don't have to compromise with the GEN III HD7. At LUCID Optics we recognize that no two shooting situations are ever the same. We feel your optic should be able to provide functional feature benefits to assist in most situations. The HD7 has been designed from the ground up to be a strong, reliable optic that offers the most in operator selectable features and benefits that exceed the market standards at a price that is friendly to the wallet.

The HD7 is a solid alternative to other much higher priced optics on the market today. Give the HD7 an honest look and we think you will agree.

LUCID OPTICS competitive Shooter Jimmy Woodford
tearing it up at a match in 2018

1X - 6X RIFLE SCOPE

This one took a moment to get right. While listening to our customers, competitors and tactical operators alike, we achieved a crystal clear true 1x to 6x performance driven optic.

With the implementation of the proven glass etched P7 reticle - this optic is ideally suited for the AR platform for use in short to medium range applications with most any caliber. Packed with a TON of well thought out features - the performance profile of this optic truly exceeded our expectations with edge-to-edge sharp, crisp image resolution through the entire magnification range. The eye relief is generous and forgiving providing a clean and expansive field of view even under less than ideal shooting positions. In close quarters the operator will enjoy a true 1x, no magnification sighting image presentation allowing the optic to be run with both eyes open increasing the situational awareness. With an ocular focus and a reticle illumination in the calming LUCID Optics blue, the target acquisition has never been easier in any light condition.

Built on a very durable 30mm aircraft grade one-piece tube construction, the 1-6x24 is built to take the abuse of a serious operator and ask for more.

The windage and elevation turrets offer 60 MOA either side of optical center set with our easy to use lift, adjust, press down to lock design that is highly accurate and durable with re-zeroable turrets. The 1-6x24 offers an operator selectable magnification lever for fast changes to the zoom function. When you are looking for a well-rounded and full featured optic for the tactical use, look no further - the LUCID Optics 1-6x24 will not disappoint.

P7

4x Prismatic Combat Optic

ON TARGET - UNDER BUDGET

Over the years, LUCID Optics has had many requests for a 4x magnified combat optic. True to LUCID Optics fashion, we always listen to our customers. Through heavy R&D, we settled on an intricate mix of features and benefits put together in the standard LUCID Optics way, where overkill is underrated.

We gave the P7 a crystal clear 4x optical performance and a proven cast aircraft grade aluminum frame for proven durability, then wrapped it in the same chemical rubber housing as we do with the HD7. Keeping with the success we had in offering a unit with a common power source, we built the electronics of the P7 around the readily available AA power source providing up to 2500 hours of “on target” use.

The P7 offers fast targeting with a highly useful ballistic MOA measuring tape in the (P7) reticle. This reticle is specifically designed to offer the fast target acquisition necessary in a combat optic, along with highly useful MOA measuring tape, ballistic hold over information up to 80 MOA in elevation. This reticle will allow for the operator to manage any target with relative ease, near or far.

As expected, the P7 has been designed from the ground up to be a strong, reliable optic that offers the most in operator selectable features and benefits that exceed the market standards at a price that is very affordable.

BINOCULARS

HIGH DEFINITION LIGHT WEIGHT

As sportsmen, we nearly always have our eyes glued into our binoculars while in the field, either scouting or actually on the hunt. Here in the West, wide open spaces and looking for game over expansive distances is a very normal thing. As an optics company we get requests for binoculars all the time. So this year, we took up the challenge of developing a set of high quality, light weight binoculars offered in 10x42 and 8x42. Both with a super high resolution ED lens performance.

Designed with a light weight frame and exceptional glass, The B-10 and B-8 Binoculars out perform the competition at half the price. Weighing in at a slender 24oz, designed with an aluminum reinforced glass filled polymer open frame, utilizing high definition ED Fluoride lenses, these binoculars truly have nothing in their price point that is a fair comparison. We also made sure that they were waterproof and fog proof just for extra peace of mind.

The field of view is generous to say the least and the resolution produced has the clearest color accurate image possible. After all, when you are looking at your quarry from across a canyon, you need to be able to see well enough so you can make the decision to traverse the canyon or not.

We also added creature comforts. These are things like twist-up ergonomic eye cups, a nice neoprene cover and padded neck strap. To top it all off we added a rugged waterproof hard sided carrying case just to keep everything safe. As with all things Lucid Optics, we back them with our lifetime warranty so you have no worries on your end.

ED Fluoride Lenses - High Definition performance

Smooth & Precise focus

Light Weight Open Frame Design

SC9

HIGH DEFINITION ULTRA COMPACT SPOTTING SCOPE

While at the range last year we were playing around with some of our spotting scopes. As usual, disappointed with the sizes, features and benefits in contrast to the cost of these often near behemoth range optics - we wanted the performance of the larger glass with the packable size of the typical novelty items. It was here, on the range, over the smell of gun powder, that the concept of the new LUCID Optics SC9 Compact Spotting Scope was born.

After carefully reviewing a long list of optical desires, we developed the optical system with ED glass and fully multi-coated lenses. This enabled us to provide all of the expected color, contrast and edge to edge clarity that a LUCID Optics customer has grown accustomed to. Then, we balanced the optics performance with an oversized eye piece and a 56mm Objective lens, giving the new SC9 such a tiny foot print that this optic can be taken most anywhere with ease.

With a close focus of 7' 2" out to infinity, this tiny yet powerful spotting scope delivers such an exceptional view from the 9x all the way through the surprisingly powerful 27x that we often forget that the optic is so small. Give this item a look, for the price, you may just fall in love.

MSRP: \$599

56mm ED Glass Performance

MLX

4.5-18x44 MIL/MIL, First Focal Plane, Rifle Scope

ON TARGET - UNDER BUDGET

Over the years LUCID Optics has had several requests for a First Focal plane, MIL / MIL rifle scope. While we were growing into the rifle scope space from the red dot market, we always found fascination with the first focal plane optical engineering in rifle scopes. So when it came time to bring an optic like this into our mix, we went to the matches and sat at the bench with competitive PRS shooters and professional bad guy hunters alike. It was in these discussions that we learned exactly what the needs of a First Focal plane optic operator may want. True to LUCID Optics ideal we balanced the “Must Have”, list of features and benefits with the “Want to Have”, list of specifications and are proud to introduce the MLX Rifle scope.

This precision optic was built from the ground up, offering a crystal clear 4.5-18x magnification range , built on a proven and easy to mount, 30mm, one piece, 6063 aluminum tube construction with nearly 6” of mounting length. The optical system is set on the Front Focal plane, keeping the MLX reticle measurement aspects precisely consistant through the entire range of magnification. The NEW MLX reticle is a highly useful Mil based reticle with over 10 MILS of measurement in “hold over” and 5 MILS of hold under available on the highest magnification in the field of view. The windage and elevation turrets are metered in a precise 1/10 MIL tactile and audible click adjustment increments featuring a very useful “Lift, Adjust Press down to lock, Lift Higher to re-zero”, mechanisms designed for secure and precise adjustments available to meet the needs of the shot. The glass selection and lens coatings have been specifically designed to offer an exceptional high resolution image through the carefully balanced optical engineering with a 44mm objective lens providing the light gathering performance second to few.

As always here at LUCID Optics we took all of the above in product “Wants, Needs & Desires,” in quality, balanced by affordability, then packed into a unique optic with a LUCID optics Lifetime Warranty. We are additionally proud of being able to offer this optic at a price that is shockingly low. The way we see it, no need to compromise on quality and the benefit of simply having more money for ammo is all yours.

L5

SFP, MOA BASED RIFLE SCOPE

As shooters, we expect some very specific things from our gear. Knowing how we use our gear drives the expectations and sets the stage for the design of the product. The L5 series of rifle scopes was intentionally over built and designed to offer features and performance that is not found anywhere else at this price point. We approached this product development seeking candid and detailed feedback from operators, law enforcement and military professionals as well as competitive and recreational shooters. We took all of the requests and balanced them out in a long list of our own development priorities.

The result was a purpose built optic in a stout 30mm one piece aluminum frame with all of the durability and quality that LUCID Optics has become known for. It also has a level of operator benefits and creature comforts that simply are not found anywhere else.

L5 Rifle scopes offer precise and repeatable 1/8 MOA windage and elevation adjustments on lockable and re-zeroable, tactical style turrets. The side parallax adjustment combined with the ocular diopter adjustment provides a crisp target image over the entire magnification range. The L5 Reticle is a precise MOA measuring device with 2 MOA increments below the rifle's zero and meaningful windage values built in.

With the 4-16x44 "Cross Over" rifle scope, LUCID Optics is providing a quality solution for the hunter. This optic has all of the same over built developments and precision qualities as the bigger brother, but is offered in a magnification range that is more suitable for the hunter.

C3

300 LUMEN, WEAPONS LIGHT

The C3 Weapons light from LUCID Optics was born from a desire to push back against the darkness and manage things that may go bump in the night.

We over built this little unit in a 6061 aluminum housing, making it waterproof and shockproof up to .458 SOCOM, because we know how gentle our customers treat their gear.

This super durable and shockingly powerful torch at 300 LUMENS is guaranteed to shed light on the situation, so you can make a good decision on threat management.

Specifically designed from the ground up, for use on a carbine, under the consult of those who hunt bad guys for a living, not by a suit in a high rise building.

This low profile torch has a simple on off pressure switch function for hands free operation and a highly disorienting strobe with near seizure causing function, with a simple press and hold of the switch.

Powered by (3) AAA batteries that you can find nearly anywhere, this light is simple, durable and exceeds expectations, with a run time of just over 3 hours of continual use.

Considering the high value and super affordable price point, not to mention the Lifetime Warranty, this is truly a weapons light, done right.

Get yours today!

ACCESSORIES

2x-5x Variable Red Dot Magnifier

LUCID Optics is proud to offer the world's first variable magnifier for red dot sights. Now the operator is able to transition quickly between a CQB operation to a designated marksman capability in an instant with the same weapons platform. All the while maintaining quality target identification and precision shot placement. LUCID Optics 2x-5x Variable magnifier mounts behind any red dot sight (with the right mount). This high quality optic offers crystal clear optical performance, and maintains an expansive field of view with a comfortable eye relief through the entire magnification range. NOTE: The 2x-5x Variable Magnifier from LUCID Optics has been updated to offer an ocular focus ability!

2x Magnifier for the HD7 Red Dot

The LUCID Optics screw-in 2x magnifier is an option available for the LUCID Optics HD7 red dot sight. This magnifier was specifically designed to answer the demand for those who want a dedicated magnified view for their 1x red dot optic. With a built in ocular focus adjustment and a very forgiving eye relief this magnifier will bring the targets close enough to gain the added precision you may be looking for on your set-up. Also, those operators that may have a tiny bit of uncorrected astigmatism should know that a little magnification will help correct the appearance of a blurry reticle.

ACCESSORIES

LUCID Optics Snap Rack

No amount of catalog space could ever do the elegant simplicity of the LUCID Optics Snap Rack justice. This incredibly simple yet effective vehicle firearm storage system is Safe, Simple and Effective. With the Snap Rack your firearms can be safely and securely stored in your vehicle and be easier to access than ever before. Working with the natural laws of gravity and the post on the head rest in your vehicle. The firearm is placed into the Snap Rack in a vertical, “muzzle up” orientation. When the firearm is needed simply grasp the barrel and snap the rack. Then the firearm is free to go to work in your capable and responsible hands.

MSRP: \$14

SPECIFICATIONS:

- Universal fit on most vehicles
- Fast “one hand” operation
- Safe & Secure Firearm Storage
- Limited Lifetime Warranty
- Made with Pride in the U.S.A.

See the Snap Rack in action.

LUCID Optics, PRO - QD, 30mm, Mounts (Low, Med & High)

The LUCID Optics PRO series QD 30mm mounts include the top ring with a sensitive Anti-CANT device designed to help eliminate inadvertent rifle tilt in precision marksmanship. These mounts are well thought out and a quality platform for the connection between your rifle and the optic.

MSRP: \$169

SPECIFICATIONS:

- 6061 Aluminum
- QD Attachment
- Weight: 7 oz.
- Lifetime Warranty
- Anodized Matte Black
- No Proprietary Tools Required
- "Blue" Anti-CANT level included

30mm Pro Bubble Level

The perfect accessory for the LUCID Optics QD 30mm mounting system. The top ring with bubble level will help eliminate inadvertent rifle tilt in precision marksmanship.

MSRP: \$39

SPECIFICATIONS:

- 6061 T6 Aluminum
- No Proprietary Tools Required
- Precise Level
- T3 Mil-Spec Anodized
- Weight: .2 oz.
- Lifetime Warranty

LUCID Optics Flash Filter Accessory

This accessory reduces any annoying lens glare and reflection as well as adds an extra level of protection for the objective lens of the HD7 red dot sight, P7 4x Combat Optic and now the 44mm L5, MLX and the 50mm L5 Rifle scopes.

MSRP: \$39

SPECIFICATIONS:

- 6061 T6 Aluminum
- Weight: .2oz. to .4 oz.
- Compatible with HD7, P7, L5 & MLX
- T3 Mil-Spec Anodized
- LIMITED Lifetime Warranty

LUCID Optics, QD, 30mm Mounts (Low, Med & High)

The LUCID Optics QD 30mm mounts are made for putting high power glass onto nearly any firearm with a picatinny rail available. The cantilever throws the scope out front, allowing for the proper eye relief. Precision machined from 6061 aluminum and finished matte black. They feature a simple and adjustable QD Lever attachment system, to accommodate both in spec and out of spec rail systems.

MSRP: \$164

SPECIFICATIONS:

- 6061 Aluminum
- QD Attachment
- Weight: 7 oz.
- Anodized Matte Black
- No Proprietary Tools Required
- Lifetime Warranty

ACCESSORIES

TP4 - Aluminum (4) section Tripod w/ball head Mount

When it is time to glass, you need to get stable. The TP4 full size Tripod offers exceptional stability in an elegant four section aluminum tripod. Offering the ease of twist lock leg sections, you can get to the right height quickly. The included ball head mount has enough adjustments to get you in the right position for viewing. The built-in Mono-Pod feature allows for an ultra light and fast platform for folks on the go. This full featured tripod is sure to get you stable and let you see with a LUCID Optics view, "clearly".

Ball Head Mount Included

Fast Twist Lock Leg Sections

Mono-Pod w/Ball head attached

MSRP: \$179

SPECIFICATIONS:

- Height: 17.5" to 62"
- Weight: 3lb, 1oz
- Hand Warmers (2 Legs)
- Rubber Non Slip Feet
- 2 Position Legs
- 4 Section legs
- Back Pack Anchor
- Hand Lanyard
- QD Optics Plate

Rifle Scope Sun Shade

The LUCID Optics L5 50mm & 44mm Sun Shades are ideally suited for use with latest versions of the LUCID Optics rifle scopes. This accessory shade assists with sun glare when shooting in early mornings or facing into the direction of the sun.

MSRP: \$25

SPECIFICATIONS:

- 6061 T6 Aluminum
- T3 Mil-Spec Anodized
- 50mm & 44mm Diameter
- 3.25 to 4" in Length, (interconnectable, for more length)
- Limited Lifetime Warranty

LUCID Optics Neoprene Optic Covers

You asked for protective covers, so LUCID Optics worked on delivering one of the best solutions possible. Constructed using high-quality Neoprene core, laminated with Nylon. It's simple yet effective design safeguards your optic against dings, scuffs, scratches, dust, dirt, and moisture. Protect your LUCID Optics product from the elements.

MSRP: \$24 - \$20

SPECIFICATIONS:

- Recommended for LUCID Optics HD7, P7, L5 and MLX Rifle Scopes
- Limited Lifetime Warranty

THE WARRANTY EXPLAINED

LUCID Optics takes quality control and customer service VERY seriously. We do not see a lot of issues with our products, but things happen. From time to time we need to address an issue. In this process, we will do everything possible to make the situation right and fair for all involved. Our customers are our top priority.

Our LIMITED LIFETIME WARRANTY is a guarantee that LUCID Optics branded items will be free from manufacturer defects and will hold up to normal wear and tear. Please note that this is not a license to abuse our products and then ask for a refund. Also, please be sure that ALL other potential sources of any issue are explored before making a warranty claim. This simply saves everyone time and effort.

NOTE: We take advantage of the ability to video selected warranty reviews for our internal training and to better communicate with customers. This process is a highly effective communication tool and allows us to show our customers exactly what we see and find during the review.

Bottom line, if there is truly a problem with the item, LUCID Optics will make every effort to make the situation right. As for the non-LUCID Optics branded items we may carry, they will be subject to the original manufacturer's warranty.

2018 LUCID Optics Long Range Clinic Montana Crew

ALL warranty issues need to be handled by LUCID Optics directly with the customer. Please don't take a LUCID Optics item back to the dealer to resolve, as they will have very limited resources and abilities to assist you in getting the issue resolved. Please bring the issue to our attention directly.

If you experience an issue with one of the LUCID Optics items please let us know. Often emailing us at support@lucidoptics.com is the best first step. We will first attempt to help you troubleshoot the issue. If we are unable to help you resolve the issue initially we will need to open a formal warranty review case. Rest assured, your issue will be handled personally and professionally.

We have developed a fair, formal process for warranty reviews to be conducted in a detailed, professional manner.

The first step in a LUCID Optics Warranty review is to reference the policy on the back of the box or the manual. This information will have the warranty policy as well as the shipping address on it for you.

The second step is to reach out to LUCID Optics directly either through e-mail (support@lucidoptics.com) or to call us directly (307-463-2633). Typically, we are available anytime between 8a.m. & 5p.m. Mountain Standard Time.

In this conversation we will discuss the potential issue and possibly issue a Return Authorization number. This (RA#) is a basic reference for us indicating that the proper conversations have been had in efforts to troubleshoot the issue prior to having the item sent back. Please write the RA# on the outside of the shipping box. On the inside it is critical that the customer provides us with a complete set of contact information, (Name, Phone, e-mail & return shipping information.) Also, please include a detailed message about the issue and how it was discovered.

Once received, we will get the item in process immediately and e-mail you alerting you that it has been received. If we can reproduce the issue and classify it as a manufacture defect, we will repair or replace the item.

Operating Hours - LUCID Optics is a small but growing company that values our family and time away from the office. We are available anytime between 8a.m. & 5p.m. Mountain Standard Time. If we don't answer your call please leave us a message and we will be sure to get back with you as soon as possible. One of the most effective, methods of reaching us is via e-mail. (support@lucidoptics.com)

JOIN THE 1760 CLUB

**DUDE, YOU HAVE TO MAKE
THIS AVAILABLE TO
EVERYONE!"**

This statement came, while in preparation for a hunting trip, we outfitted a friend of mine's rifle with some new glass. After he refined his 100yd zero on his old, Savage 7mm Mag, I showed him what was possible with the L5, second focal plane riflescope we just put on his rifle.

With an adjustment of the magnification ring, I showed him where to hold in the reticle. Then with ease he struck the steel set 1760 yards away and nearly had a heart attack when he was able to reacquire the target and 3.25 seconds from the trigger squeeze, see his shot splatter paint at a mile.

Thus, the LUCID OPTICS 1760 Club was born. So, If you want to learn more, or wish to earn yourself a 1760 challenge Coin for the 1760 Club from LUCID Optics, please don't hesitate to reach out to us at info@lucidoptics.com

A few strikes on our 2MOA steel set at 1760 yards

Drew McConnell, earned his coin, summer 2017

The FNRA CO - KS Crew joined the 1760 Club with ease.

NOTES FROM THE FIELD

I had the opportunity to hunt in the beautiful state of Wyoming with the Hunting with Heros organization. "As my sponsor for the event LUCID Optics also got to provide the guide service for me. It was a pleasure hunting with the LUCID Optics family, it was by far one of the best hunts I've ever been on."

The terrain, the stalk, and the weather were tough on me since I had my right leg amputated a couple of weeks before I made out to the hunt. After a long day of hunting, we finally spotted a trophy antelope at 1200 yards out, made a sneak to a close 800 yards away. We got set up in the prone position, made adjustments, and I pulled the trigger on the L5 equipped 28 Nosler.

The clarity and ease of use of the reticle in the scope impressed me the most, I will continue to use the product on all my future hunts. A special Thanks to the LUCID Optic family for the hunt and hospitality not to mention an amazing product.

- SGT, Omar "Crispy" Avila
US ARMY

As the Wyoming Field Rep for the NRA, I truly feel privileged, having a unique insight into LUCID Optics through my work with the Friends of NRA program. Also my friendship with all of the staff. I truly enjoy watching my friends grow with their company and it is inspiring to see how they approach the challenges of this industry.

Now in my 3rd long range clinic, I learn something new about my optic, gun, and myself every time I get to sit at the bench with these folks. The wealth of knowledge found at LUCID Optics is staggering. I would recommend this outstanding class and their optics to anyone.

My most memorable shot was my first hit on the mile target. I expect that would be most folks. Second by just a fraction, was with my personal new 338 and L5. 100 yd. zero. Hold at the post, first shot at a mile five feet low left. Total Operator error, Second shot hit. The LUCID Optics make it simple.

Will some accuse me of being biased, SURE. Am I? Damn right I am. LUCID Optics only for this kid.

- Dave Manzer
NRA Sr. Field Rep RETIRED - WY

When I retired, I committed to myself to do more shooting. After 4 or so years concentrating on handguns—acquisition of more and training, I decided, at the urging of my Primary Care Physician, to think about long range rifle marksmanship.

Step four or five of my adventure into the world of long range rifle was a call to Jason Wilson of Lucid Optics. He mentioned having a couple of empty slots in their upcoming clinic. Lucky for me, I was able to travel to Riverton, WY between wildland fire assignments and participate in the clinic. I HAD A BALL!!

I met new shooting friends from around the country, had a great partner when we paired up into shooter/spotter teams, thoroughly enjoyed all the help from Jason's great staff, and tagged the one-mile target three times out of five shots from two different rifles. First, Brandy let me shoot "her baby" (7mm mag)—two for two. I faltered with my first shots from Jason's .338 Lapua, but the third time was a charm.

All in all it was a great experience that I hope to be able to repeat. And, of course, I now own two LUCID Optics rifle scopes and a spotting scope.

- John Sanders
Fire Fighter, Montana

I had the privilege to come out to LUCID Optic's long range shooting clinic this year along with (11) of my Friends of NRA Volunteers'. We had the best time shooting and learned more about optics and long range shooting than I could imagine, Jason and his wife along with the staff treated us like long lost friends and a great time was had by all, most of the guys that came out had never taken shots over 100 yards and along with that 7 of the 12 total guys had never even shot the Ruger 6.5 rifle that they brought to shoot until the day of the shoot, with that said within 2 hours on the range with Lucid this group of guys with the staffs guidance started hitting the steel targets at 600 yards and by the end of the day most hit targets at 1200 yards with consistency

I personally have shot quite a lot at ranges out to 800 yards and thought I knew what I was doing but after the first hour I learned so much more, this was the best time I have spent on the range in a very long time and all 12 of us are planning a return trip to Riverton for an Advanced class in the spring of 2018 and I know LUCID Optics will make it great as well

- Tim Bacon
NRA Sr. Field Rep - IA - NE

TECHNICAL DETAILS

MLX RETICLE & FIRST FOCAL PLANE

The LUCID Optics MLX riflescope is equipped with the MLX reticle, designed to be clean and simple to use. The MLX reticle will easily assist the operator in moving target lead holds, long distance shot placement and range estimation. Set on the first focal plane, the increments in the MLX reticle are constant at all magnification ranges. The precise etched glass reticle ensures that the MLX is kept to the tightest tolerances possible.

The MLX reticle is based in "milliradian" in short, "MIL's". A milliradian is a specific, trigonometric, unit of an optical, angular measurement. There is a lot of math involved in developing a shooting solution and arriving at a usable measurement for a shooter. So we will simply cut to the chase and give you the measurements you need to know. If you want to learn more about the actual math involved, *For more information on this reticle please reach out to support@lucidoptics.com*

One MIL equals 3.6 inches at 100 yards. The MLX reticle is metered in (MIL - 1/2MIL) increments or at 100yds (3.6" - 1.8"). Reference the chart below for a general guide advancing out over distance.

1MIL @ 100yds = 3.6"	1MIL @ 200yds = 7.2"	1MIL @ 300yds = 10.8"
1MIL @ 400yds = 14.4"	1MIL @ 500yds = 18"	1MIL @ 600yds = 21.6"
1MIL @ 700yds = 25.2"	1MIL @ 800yds = 28.8"	1MIL @ 900yds = 32.4"
1MIL @ 1000yds = 36"	(and so on, and so fourth to infinity)	

In order to use the MLX reticle effectively, you will need to know the ballistic profile of your projectile and load as fired from your firearm. Things like bullet weight, projectile B.C., muzzle velocity, and other environmental details such as relative humidity and elevation for "air density" calculations, will effect the flight of the bullet over distance.

L5 RETICLE & SECOND FOCAL PLANE

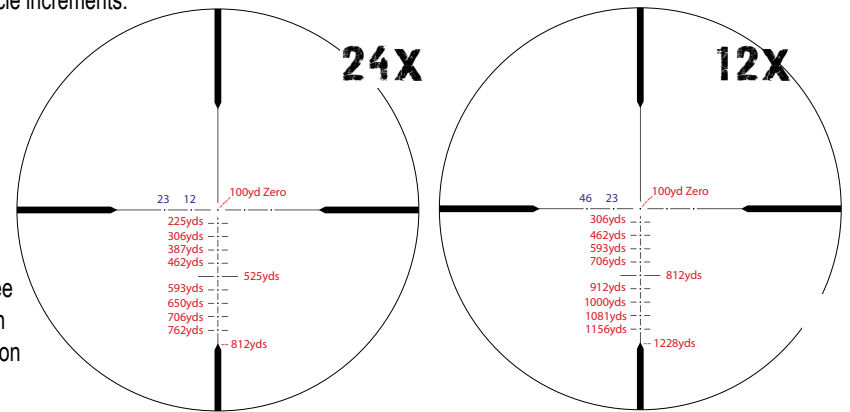

The L5 reticle is a simple MOA measuring tape with useful hold over increments set 2 MOA apart on the highest magnification setting. With precise magnification markings, the operator can take advantage of the Second Focal Plane and tune the reticle to the ballistic curve of their load, making the increments truly meaningful for Hold Over. In The Second Focal Plane, the operator can back off the magnification to fine tune the distance between the hold over reticle increments.

NOTE: With the L5 reticle and a 100yd ZERO, Most of the center fire cartridges are 1760yd capable without adjusting the elevation turret.

NOTE: We like the simplicity of the ballistic App STRELOK. This allows for the operator to input their data and environmental and see a graphical representation of their reticle with shot placement. Be sure to get the \$4.99 version as the LUCID Optics Reticles are not in the FREE version.

EXAMPLE: • 6.5x284NORMA • Zero: 100yds • 140g Berger • B.C.: G2.618 • Muzzle Vol: 2850fps • Altitude: 5000ft • Temp.: 50°

| (I) The Windage Dots, 4 MOA apart | | |

For more information on this reticle please reach out to support@lucidoptics.com

P7 RETICLE

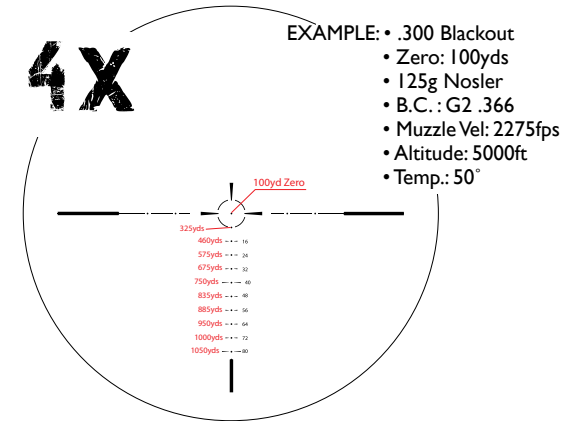

Like the proven L5 reticle, the P7 reticle is a simple MOA measuring tape with useful hold over increments set 8MOA apart. The P7 reticle shines in fast target acquisition. The sighting circle with the framing wedges allow the operator to gain a precise hold on the target very quickly.

The P7 also provides meaningful wind estimation dots to reference while shooting in less than optimal conditions.

Used in both the P7 at a fixed 4x magnification as well as the L7 in a 1x - 6x Variable configuration the reticle is VERY versatile. In the L7 1-6x24 optic the reticle is calibrated on 6x. For more information on this reticle please reach out to support@lucidoptics.com

- (A) - 4 MOA Circle, 1/4 MOA Line Width
- (B) - 1/4 MOA Zero Dot
- (C) - 1/4 MOA Cross Hair Line Width
- (D) - Sighting Wedges, 1/2 MOA thick, 8 MOA long
- (E) - 1/4 MOA Drop Dots, 8 MOA Apart
(Drop Dots are numbered with reference MOA, 4x only)
- (F) - Ref. Drop Bar (Wider) 4MOA wide
- (G) - Windage Dots, 1/4MOA:
Outside Edge of Sighting Wedge is 20MOA
1st Dot is 32 MOA from Zero
2nd Dot is 48 MOA from Zero

HD7 RETICLES

Based on a proven and accurate 2MOA dot and line width system, the HD7 Gen III red dot sight reticles are designed to get on target fast and accurately. With the ZERO POI shift when transitioning between them the rifle ZERO is always the center dot.

2MOA Dot Precision Shots

2MOA Dot

Balistic Tree Fast Targeting & Reaching Ability

Chevron Fast Combat Effective

Dot & Circle Ultra Fast

HD7 reticles are based in a 2MOA dot. Allowing for fast precise target acquisition and execution.

The hold over information in the HD7 reticles is designed to balance out between many different calibers, not to be specific to a single one. The operator is responsible for knowing their ballistics and mapping out the meaningful hold over information for their specific set up.

The **Dot** is for precise shot placement.

The **Balistic Tree** is for fast targeting with hold over information.

The **Chevron** is for multiple target shape measuring and fast target execution. With hold over information.

The **Circle Dot** is for fast target execution with the ability to lead on movers.
